Recommendation

As this pandemic situation has been going on for a year now, we can undoubtedly say that healthcare got affected most. This past year we have tried almost all kinds and types of masks on the market. As a paramedic it was viable to find the perfect solution. Thanks to a charity offer this January from KC Struktur, I have had the opportunity to find simply the best and most practical protective equipment there is to wear. In my opinion the KC Mask is the best there is, a perfect choice.

To support my point of view I could mention the followings:

- Airflow only through filters (perfect attachment);
- No fogging on glasses;
- Its straps help to attach the mask properly;
- Ensured 99,98% protection
- For better breathing capacity, double filter can be applied;
- It can be disinfected without effort;
- Since the KC mask is equipped with filters not valves, sick people could wear it as well without making their environment or colleagues sick.

3/4 of the workers - at the ambulance station in Mosonmagyaróvár - are proudly wearing their own superb and super safe masks. The same facts are true to the local hospital's emergency room workers as well.
