Topic: experience with KC virus mask

Our healthcare system has been put in a difficult situation in this past one, one and half year.

During a pandemic our primary aims is to protect our colleagues whose duty is to save lives day by day. Our company put a great emphasis on getting the proper safety tools. It is most vital because during our work, air rescuers are put in compromised situations, eg. there is high possibility for aerosol formation.

Thanks to a donation towards the Hungarian Air Ambulance Nonprofit Ltd. we had the chance to try out the so called KC virus mask.

Our experience with the mask are very positive. It has numerous excellent features, such as the double filtration system, its usage is safe and change of filters is quick and simply. It is practical design helps to put the mask on without effort. If the mask is applied correctly, it is compatible with glasses, absolutely no fogging. It can easily be disinfected and is featherweight. It has made communication during work easier.

Our colleagues wearing it with pleasure and as it was an original part of the equipment.
